

Floor Clamp Kit

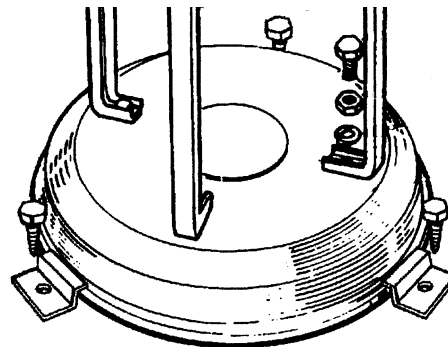

The purpose of the Floor Clamp Kit (Part Number 27020) is to provide supplementary safety and stability for our portable patio heaters. Floor Clamps should be used to secure portable patio heaters to help prevent tip over. Please review the following steps.

1. Always place the heater on a level and stable floor or dock surface.
2. When using the Floor Clamp Kit always place clamps at equal distance around the circular base as shown.
3. Use appropriate anchors for concrete floors or deck.
4. Tighten clamps securely to edge of the base using the lag bolts provided or other suitable hardware.
